

# Summer Risk Update - 10/01/24 - 17/01/24

## Current Level

2

Ban on sprinklers and  
irrigation systems

## Chance of Level 3 this summer

76%\*

Our latest modelling  
shows this is most likely  
to occur in late Jan\*

## Chance of Level 4 this summer

33%\*

Our latest modelling  
shows this is most likely  
to occur in early Feb\*

## Buffer Average past 7 days

13%

Buffer is less than 20%\*\*  
We are moving to  
Level 2

## Buffer Forecast next 7 days

13%

\*\*  
We are moving to  
Level 2

## When is risk the highest?

Risk of deficit by week

\*This modelling is reviewed each month and updated as necessary.

\*The efforts of the public following water restrictions can reduce this chance, but this requires everyone to do their bit.

\*\*The buffer is one key indicator of risk, and is offered as a guide only. Other factors are monitored as part of level risk assessment. The buffer is reviewed weekly.
