Dear David

WGN180065 non-notified resource consent application: Notice of decision

I am pleased to inform you that on 16 February 2018 your application related to the construction of the Ōmaroro Reservoir at Prince of Wales Park was granted to:

- Take and use groundwater for the purposes of dewatering excavations;
- Discharge stormwater runoff from areas of bulk earthworks and de-watered groundwater both treated with chemical flocculants, to land, the stormwater network or directly to water; and
- Undertake earthworks of an area of more than 3,000 m², including to excavate land that may intercept groundwater (bore).

I have enclosed a copy of the report outlining the reasons for this decision and the consent certificate¹. If you have any questions or concerns about any aspect of your consents, I would be happy to discuss them with you.

Consent term and conditions

Your consents expire on 16 February 2028. Please note that, under section 125 of the Resource Management Act 1991 your consents will lapse in ten years unless you begin to use them before then. It is important that you familiarise yourself with all of the conditions on your consents.

¹ You have the right to object to our decision under section 357(2) of the Resource Management Act 1991. Your objection must be in writing and be made within 15 working days of receiving this letter.
