

Summer Risk Update - 11/04/24 - 17/04/24

Current Level

2

Ban on sprinklers and irrigation systems

Buffer Average past 7 days

15%

Buffer is above 10%**
We are at Level 2

Chance of Level 3

16%*

Chance of Level 4

5%*

We expect to remain at Level 2 for another few weeks.

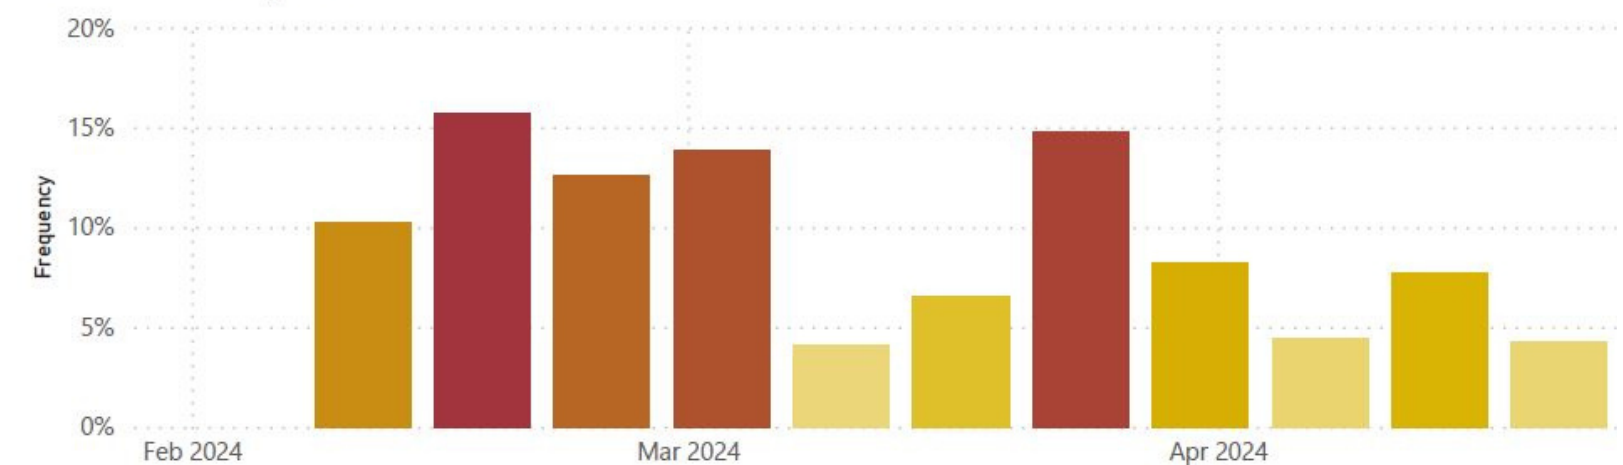

We will continue to monitor the river conditions and move down to Level 1 once it is safe to do so.

Buffer Forecast next 7 days

17%

Buffer is above 10%**
We can remain at Level 2

Risk of deficit by week

*This modelling is reviewed each month and updated as necessary.

*The efforts of the public following water restrictions can reduce this chance, but this requires everyone to do their bit.

**The buffer is one key indicator of risk, and is offered as a guide only. Other factors are monitored as part of level risk assessment. The buffer is reviewed weekly.
