

About Wellington Water – we're your water people

Wellington Water looks after everything to do with water in the Wellington Region. If it's to do with drinking water, stormwater, wastewater, water pipes, reservoirs, man holes, or pumping stations, then we're onto it.

From time to time we need to work in parks or reserves, streets and footpaths to replace or renew old pipes. We sometimes even need to come onto private property to connect up your pipes to the new ones we've laid.

Working together

We're owned by the Greater Wellington Regional Council and Wellington, Hutt, Upper Hutt and Porirua city councils and work on their behalf. By working together, we're able to provide cost-effective, consistent services across the region in a coordinated way.
